

Heuristic Evaluation

Evaluator Name:	Serhii Sokyrko
Device / Browser/ OS:	MacBook Pro / Microsoft Edge / MacOS
App / Version:	Marketplace / V5.0

SEVERITY RATING

0 = I don't agree that this is a usability problem at all

1 = Cosmetic problem only: fix if time is available

2 = Minor usability problem: fixing this should be given low priority

3 = Major usability problem: important to fix, given high priority

4 = Usability catastrophe: fix this before product can be released

HEURISTICS	VIOLATION	RECOMMENDATION	SEVERITY
1. Visibility of system status <i>Aalways keep users informed about what is going on, through appropriate feedback within reasonable time.</i>			0
2. Match between system and the real world <i>Follow real-world conventions, making information appear in a natural and logical order.</i>	1. Admin user can create category with duplicate name.	1. Handle this violation with exception for the user if there is an attempt to create category with duplicate name.	2
3. User control and freedom <i>Users should leave the unwanted state without having to go through an extended dialogue. undo and redo.</i>			0
4. Consistency and standards <i>Users should not have to wonder whether different words, situations, or actions mean the same thing.</i>			0
5. Error prevention <i>Either eliminate error-prone conditions or check for them and present users with a confirmation option before they commit to the action.</i>			0

HEURISTICS	VIOLATION	RECOMMENDATION	SEVERITY
6. Recognition rather than recall <i>Minimize the user's memory load by making objects, actions, and options visible.</i>			0
7. Flexibility and efficiency of use <i>Accelerators. Allow users to tailor frequent actions.</i>			0
8. Aesthetic and minimalist design <i>Dialogues should not contain information which is irrelevant or rarely needed.</i>			0
9. Help users recognize, diagnose, and recover from errors <i>Error messages should be expressed in plain language (no codes), precisely indicate the problem, and constructively suggest a solution.</i>			0
10. Help and documentation <i>Even though it is better if the system can be used without documentation, it may be necessary to provide help and documentation.</i>			0

Conclusion from Heuristic Evaluation

Heuristic Violated: Match between system and the real world

Issue Identified: Admin users can create categories with duplicate names, which can lead to confusion and inefficiencies.

Severity: 2, minor usability problem

Recommendation

Immediate fix:

- Implement a check to prevent the creation of duplicate category names.
- Display a clear and informative error message to the user when a duplicate name is detected, such as: "The category name 'XYZ' already exists. Please choose a different name."

Next Steps

- **Development:** implement the recommended changes.
- **Testing:** Conduct user testing to ensure the solution effectively addresses the issue.
- **Feedback:** Gather feedback from admin users after the fix is deployed to confirm its effectiveness and make any necessary adjustments.
