

Heuristic Evaluation

Evaluator Name:	Serhii Sokyrko
Device / Browser/ OS:	MacBook Pro / Microsoft Edge / MacOS
App / Version:	Marketplace / V6.0

SEVERITY RATING

0 = I don't agree that this is a usability problem at all

1 = Cosmetic problem only: fix if time is available

2 = Minor usability problem: fixing this should be given low priority

3 = Major usability problem: important to fix, given high priority

4 = Usability catastrophe: fix this before product can be released

HEURISTICS	VIOLATION	RECOMMENDATION	SEVERITY
1. Visibility of system status <i>Aalways keep users informed about what is going on, through appropriate feedback within reasonable time.</i>			0
2. Match between system and the real world <i>Follow real-world conventions, making information appear in a natural and logical order.</i>			0
3. User control and freedom <i>Users should leave the unwanted state without having to go through an extended dialogue. undo and redo.</i>	User dont have a full control over the data, he cant undo/redo certain things like: removing - recovering product, removing-recovering category	Implement recovering options for all data that might be wanted to be recovered by user	3
4. Consistency and standards <i>Users should not have to wonder whether different words, situations, or actions mean the same thing.</i>			0
5. Error prevention <i>Either eliminate error-prone conditions or check for them and present users with a confirmation option before they commit to the action.</i>			0

HEURISTICS	VIOLATION	RECOMMENDATION	SEVERITY
6. Recognition rather than recall <i>Minimize the user's memory load by making objects, actions, and options visible.</i>			0
7. Flexibility and efficiency of use <i>Accelerators. Allow users to tailor frequent actions.</i>			0
8. Aesthetic and minimalist design <i>Dialogues should not contain information which is irrelevant or rarely needed.</i>			0
9. Help users recognize, diagnose, and recover from errors <i>Error messages should be expressed in plain language (no codes), precisely indicate the problem, and constructively suggest a solution.</i>			0
10. Help and documentation <i>Even though it is better if the system can be used without documentation, it may be necessary to provide help and documentation.</i>		1. Add a small piece of documentation for the admin users.	1

Conclusion from Heuristic Evaluation

Issue Identified: Admin users require clear documentation to understand system functionalities and prevent potential errors.

Severity: 1, cosmetic fix

Issue Identified: Users should have more control over the data.

Severity: 3, major usability problem

Recommendations

Next Steps

Documentation

- **Admin User Guide:** Add a section to the admin user guide to ensure admin users are well-informed about system functionalities.

User Freedom

- **Undo/Redo features:** Implement functionality to allow users manage accidentally or purposely deleted items or categories to be recovered to initial state.
